

Stateless ve Stateful

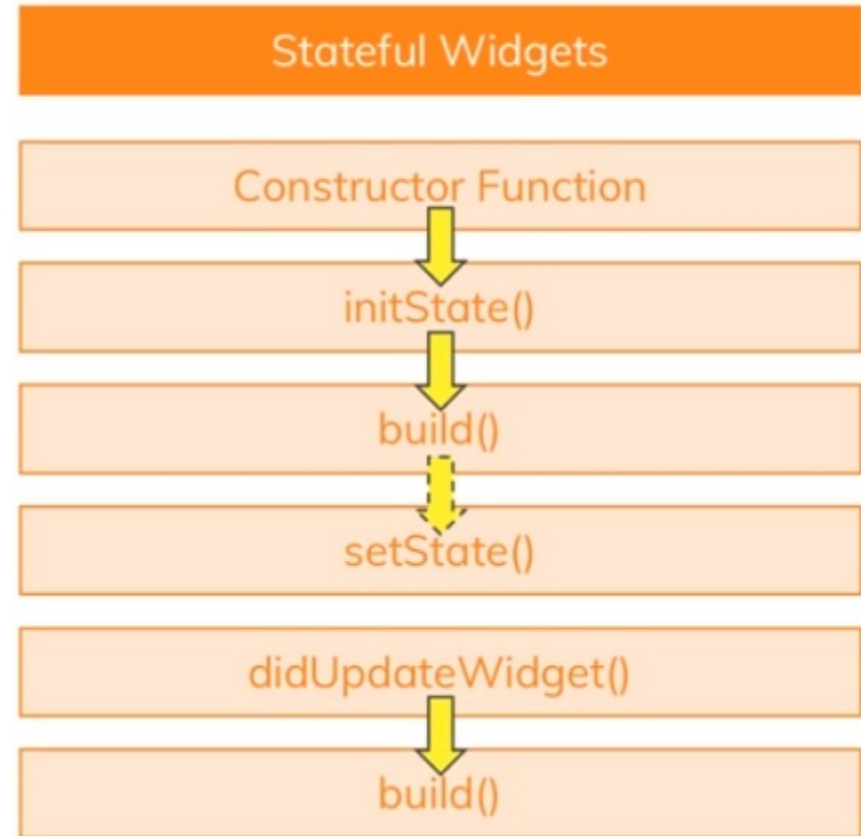

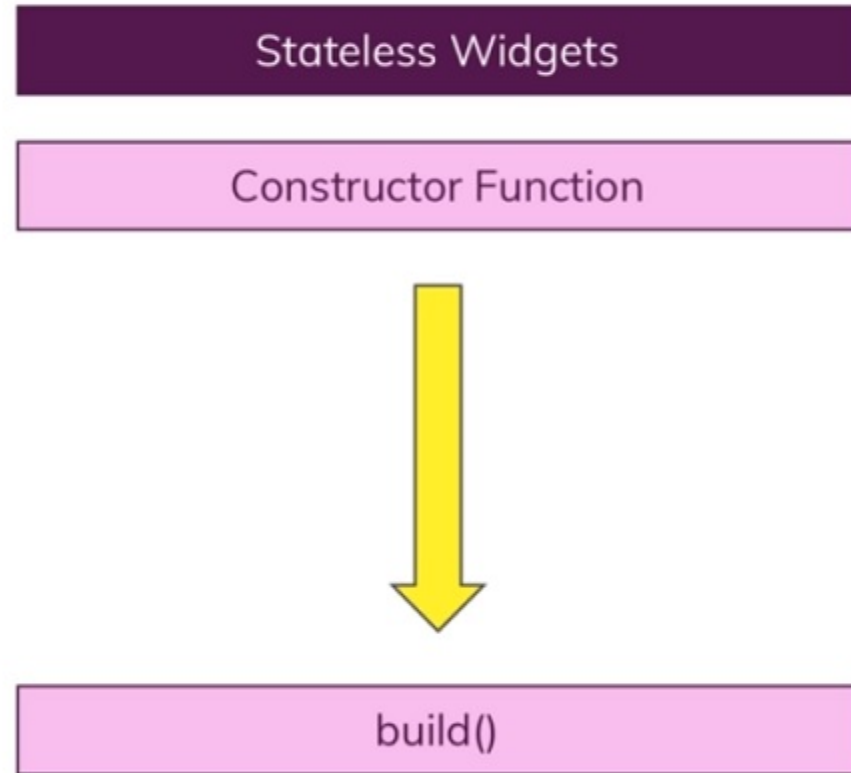

Stateless

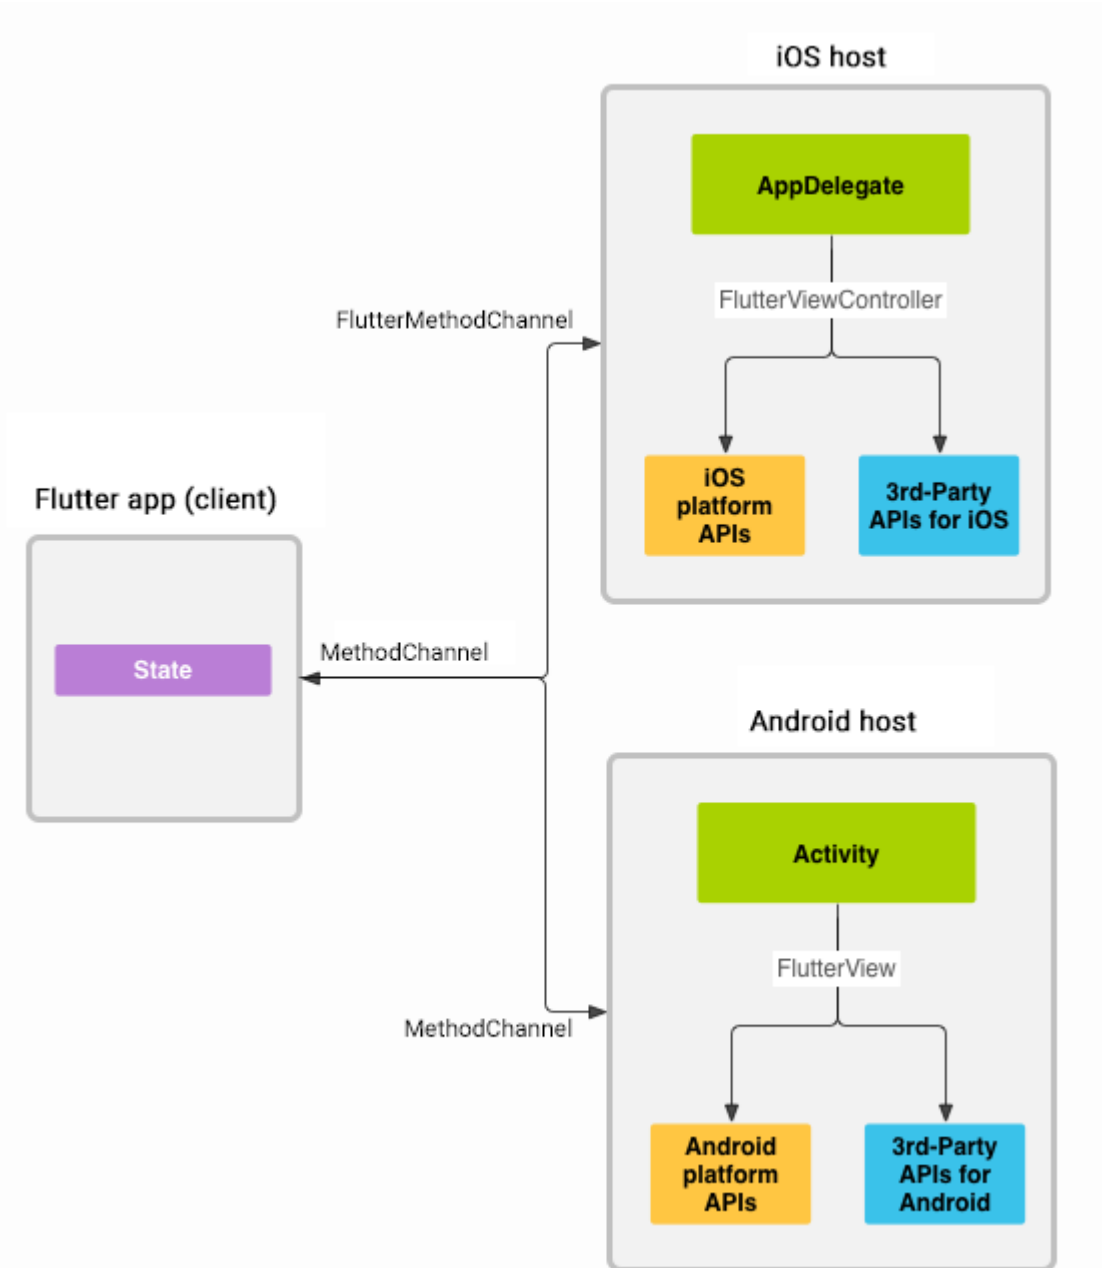

Stateful

Widget Yaşam Döngüsü

1. Flutter da Metod Kanalı (methodChannel) oluştur. (isimlendir)
2. Ve Invoke Et.
3. Android tarafta MethodChannel oluştur ve 1. aşamada ki isimle aynı olsun
4. MethodChannel üzerinde MethodHandler (Listener bu tamamen) oluştur ve Flutter tarafı dinle.

Dart ve Android aslında mesaj üzerinden haberleşir. Yukarıda yapılan da bu.
